# FINAL PROJECT REPORT

---

**DIGITAL LITERACY PROJECT REPORT**

**Name:** Rohit Choudhary
**Course:** CSE0001 – Digital Literacy
**University:** VIT Bhopal University

---

### 📌 1. Introduction

In today's digital world, technology plays a very important role in our daily lives. From communication to learning and sharing information, everything is connected to digital platforms. Before starting this course, I believed that I already had enough knowledge about the internet and digital tools. However, this project helped me understand that digital literacy is not just about using technology, but also about using it in a responsible and smart way.

This project focuses on developing practical digital skills such as creating online profiles, using coding platforms, designing infographics, and understanding online safety. Through this project, I learned how to use digital tools effectively while also being aware of their risks and responsibilities.

---

### 📌 2. Objectives of the Project

The main objectives of this project are:

- To understand the concept of digital literacy
- To create and manage a digital presence
- To learn basic coding and problem-solving skills
- To understand online safety and cyber threats
- To improve communication and presentation skills

---

### 📌 3. Task 1: Infographic Creation

In this task, I created a digital infographic to explain the concept of digital literacy. I used an online design tool to create a visually appealing and informative infographic.

The infographic included key points such as:

- Meaning of digital literacy
- Importance in daily life
- Safe internet practices
- Digital skills required for students

This task helped me improve my design skills and taught me how to present information in a clear and engaging way.

---

### 📌 4. Task 2: Digital Portfolio

In this task, I created and managed my digital presence on different platforms. I created profiles on:

- GitHub
- LinkedIn
- Kaggle

Through this, I learned how to build a professional online identity. I understood the importance of presenting accurate information and maintaining a clean and professional profile.

This task also helped me realize that digital platforms are not just for usage but also for showcasing skills and opportunities.

---

### 📌 5. Task 3: Platforms and Tools

This task included two main parts:

#### 🔹 Coding Practice

I solved a basic problem on a coding platform. This helped me understand problem-solving and logic building.

#### 🔹 Google Form Creation

I created a quiz related to digital literacy and online safety. I also analyzed responses using Google Sheets.

This task improved my understanding of:

- Online tools

- Data collection
- Basic analysis

---

### 📌 6. Task 4: GitHub Repository

In this task, I uploaded all my work to a GitHub repository. I learned:

- How to upload files
- How to organize folders
- How version control works

This task was very useful as it helped me understand how developers manage their work online.

---

### 📌 7. Task 5: Cybercrime Awareness

In this task, I studied about cybercrime, especially phishing attacks. I learned how attackers trick people into sharing personal information.

I also created a prevention checklist which included:

- Not sharing passwords
- Verifying links
- Using strong passwords
- Being careful online

This task made me more aware of online risks and how to stay safe.

---

### 📌 8. Key Learnings

Through this project, I learned:

- Digital literacy is more than just using technology
- Online presence should be professional and truthful
- Cyber safety is very important
- Communication should be clear and respectful
- Practical skills are more important than theoretical knowledge

---

### 📌 9. Challenges Faced

During this project, I faced some challenges:

- Understanding GitHub initially
- Creating proper file structure
- Designing infographic properly
- Managing different platforms

However, I overcame these challenges by practicing and learning step by step.

---

### 📌 10. Conclusion

This project was a great learning experience for me. It helped me understand the importance of digital literacy in real life. I not only improved my technical skills but also learned how to use digital platforms responsibly.

Overall, this project made me more confident and aware as a digital user. I will continue to apply these skills in my academic and professional journey.
